

ANCHORAGE MAKERSPACE

Website Photography — Photographer's Field Guide

Folder Organization & Workflow Reference

Purpose

This guide tells you where to put your photos after a shoot. Folders are organized by subject and page placement so the editor can find, compare, and select the best shots without hunting through mixed files.

How Folders Work

Each subject has its own folder. The folder name tells you two things:

- Hero- or Card- → where the image appears on the website
- Subject name → what you photographed

Examples:

- Hero-Woodshop/ → tall strip image on the home page, woodshop subject
- Card-Welding/ → landscape card on the shop page, welding subject

If Multiple Photographers Are Shooting

Inside each subject folder, create a subfolder using your name or initials and drop your files in there. Keep your camera's original filenames — do not rename anything before handoff.

Example structure:

```
Hero-Woodshop/  
  William/  
    IMG_4823.CR3  
    IMG_4824.CR3  
  Alex/  
    DSC_0091.NEF
```

Use whatever subfolder name makes sense on the day — first name, initials, whatever is clear. The goal is no filename collisions and a clear trail back to the source.

Quick Shooting Reminders

- Shoot RAW if your camera supports it — JPEG Large/Fine is fine if not
- Capture a wide shot AND a tight shot for every subject
- Do not rename files before handoff — keep original camera filenames
- If a maker is present and willing, include them — action beats empty equipment

Folder Reference

Use this table to find the right folder for each subject. The final web filename is assigned by the editor after selection — you don't need to rename anything.

Folder Name	Final Web Filename (assigned after selection)
Section 1 — Hero Strip (index.html)	
Hero-Woodshop/	image-01.jpg
Hero-Laser-Cutter/	image-02.jpg
Hero-3D-Printing/	image-03.jpg
Section 2 — Shop Cards (shop.html)	
Card-Woodshop/	image-04.jpg
Card-3D-Printing/	image-05.jpg
Card-Laser-Cutter/	image-06.jpg
Card-CNC-Router/	image-07.jpg
Card-Welding/	image-08.jpg
Card-Textiles-Sewing/	image-09.jpg
Card-Electronics-Robotics/	image-10.jpg
Card-Large-Format-Print/	image-11.jpg
Card-Open-Studio/	image-12.jpg
Section 3 — Future / Reserved	
Card-Blog-Events-Workshop/	image-13.jpg
Card-Blog-Events-Project/	image-14.jpg
Card-Visit-Exterior/	image-15.jpg

After the Shoot

- Drop your subfolder into the correct subject folder
- Let the editor know which shots you think are strongest (optional but helpful)
- The editor will select the best image, compress it, and rename it to the final image-0x.jpg filename
